## Benefits in detail

This plan provides you the option to choose from a range of premium payment terms wherein you can choose to pay premiums either for a limited duration or regularly (except in case of whole life policies) for the entire term.

Once you pay your due premiums, the premiums grow at a rate (based on the performance of the fund(s)) when allocated in your choice of fund(s). At the end of the policy term i.e. at policy maturity, you will receive the Fund Value, including top-up Fund Value, if any. On payment of Maturity Benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

### Maturity Booster

At the end of the policy term, an addition, known as Maturity Booster in the form of extra units (Units mean a specific portion or part of the Unit Linked Fund(s) in which you have saved your money) will be made to boost your Fund Value. This Maturity Booster is a percentage of the average of the Fund Values including Top-up Fund Value, if any, on the last business day of the last eight policy quarters as shown in the table below

Premium Payment Term	Policy Term		
	15-19 years	20-24 years	>24 years
Less than 10 years	2.25%	4.00%	6.00%
Greater than or equal to 10 years	4.25%	7.00%	10.00%

Maturity Booster will be allocated among the funds in the same proportion as the value of total units held in each fund at the time of allocation. The allocation of Maturity Booster units is guaranteed and shall not be revoked by the Company under any circumstances.

Please refer to Clause 4 under Terms and Conditions for more details.

### Death Benefit:

If the person whose life is covered by this policy (known as the Life Assured) passes away during the term of the policy, the insurance cover amount will be paid out as a lump sum to the Claimant, provided the policy is in-force.

Death Benefit, if the monies are not in the Discontinued Policy Fund (DP Fund), will be highest of

- Sum Assured, including Top-up Sum Assured, if any
- 105% of the total premiums paid
- Fund Value including the Top-up Fund Value, if any

Annualized Premium is the premium amount payable in a year excluding the taxes, rider premiums and underwriting extra premium on riders, if any.

On death of the life assured, before the date of maturity, while the monies are in Discontinued Policy Fund, Death Benefit will be the proceeds of the Discontinued Policy Fund applicable to your policy. On payment of Death Benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

For minor lives, life cover commences from the date of commencement of the policy.

## What makes ICICI Pru EzyGrow a cost-effective ULIP for you?

To provide you life insurance cover, a certain charge called mortality charge is deducted from the premiums that you pay by redemption of units before allocating them to the funds. Similarly, other charges known as policy administration charge (for administration of your policy) and fund management charges (for management of funds) are also deducted every month. Please refer to the section on 'Charges in the Policy' mentioned later in the document to know more.

### Return of Mortality and Policy Administration Charges

Starting from the 6<sup>th</sup> policy year, at the beginning of each policy month, the mortality and policy administration charge (excluding taxes and extra mortality charges, if any) deducted from the policy in the 60<sup>th</sup> month prior to the policy month, will be added back to the Fund Value in the form of addition of units, in a corresponding manner.

These will be added in the form of units to the Fund Value.

Please refer to the table below to understand when these charges are returned:

What gets returned?	When it is returned?	
	Policy Year	Policy Month
Mortality and Policy Administration Charges deducted in 1 <sup>st</sup> year, 1 <sup>st</sup> month of the policy	6	1

Mortality and Policy Administration Charges deducted in 1 <sup>st</sup> year, 2 <sup>nd</sup> month of the policy	6	2
:	:	:
:	:	:
Mortality and Policy Administration Charges deducted in 10 <sup>th</sup> year, 12 <sup>th</sup> month of the policy	15	12
and so on...		

i.e. at the beginning of 61st policy month, the mortality charge (excluding taxes and excluding mortality charges) and policy administration charge (excluding taxes) deducted in the 1st policy month shall be added back. Such additions shall continue till the policy is in force and all due premiums till date have been paid. If you have opted for multiple funds then, the charges will be added among the funds in the same proportion as the total units held at that time. Units equivalent to the amount of charges to be returned will be allocated between the funds in the same proportion as the value of total units held in each fund at the time of allocation.

The allocation of units for Return of Mortality Charges & Policy Administration Charges is guaranteed and shall not be revoked by Us under any circumstances.

### Zero Premium Allocation Charges

To get you kickstarted with your savings journey, we will allocate the entire premiums that you pay without deducting any premium allocation charges.

Let's understand the plan through an example.

#### Illustration:

Mr. Siddeshwar is a 30 year old, who is looking for a plan that can give him the opportunity to get market-linked returns.

**Premium payment option:** Limited Pay – Limited term

**Premium payment mode:** Annual

**Amount of instalment premium:** ₹ 50,000

**Sum Assured:** ₹ 5,00,000

**Premium payment term:** 10 years

**Policy term:** 20 years

**Total premium paid:** ₹ 5,00,000

Since the fund value will depend on the performance of the fund, we have assumed that 100% of the premiums are paid in Maximiser V and the fund returns are also assumed at 4% p.a. and 8% p.a.

Assumed investment returns	8% p.a.	4% p.a.
Fund Value at Maturity (in ₹)	12,88,435	7,03,179

The returns shown in the benefit illustration i.e. 4% p.a. and 8% p.a. are not guaranteed and they are not the upper or lower limits of what Mr. Siddeshwar might get back, as the value of his policy depends on a number of factors including future investment performance.

Mr. Siddeshwar also has the option to receive the maturity benefit i.e. the Fund Value in the form of regular income for a period of one to five years instead of a one-time lump sum. Please refer to Clause 6, Settlement Option under Additional flexibilities for more details.

## 2. Partial Withdrawal Benefit

This facility is designed to help you provide liquidity so that any immediate financial need can be met. You can avail this any time after the completion of five policy years, provided the monies are not in the Discontinued Policy (DP) fund. You can make partial withdrawals as long as the total amount of partial withdrawals in a year does not exceed 20% of the Fund Value in a policy year. The partial withdrawals are free of cost.

You can make partial withdrawals after completion of lock-in period and payment of five full year's premiums and if the monies are not in DP Fund. . In the case of policies on minor lives, partial withdrawals shall not be allowed until the minor life insured attains majority i.e. on or after attainment of age 18.

For the purpose of partial withdrawals, lock in period for the Top-up premiums will be five years or any such limit prescribed by IRDAI from time to time. Partial withdrawals will be made first from the Top-up Fund Value (if any) which has completed the lock in period, as long as it supports the partial withdrawal, and then from the Fund Value built up from the base premium(s).

You can withdraw a minimum amount of ₹2,000 on each withdrawal.

You can continue with partial withdrawals till the Fund Value reaches two times of the annual premium. The partial withdrawals shall not be allowed which would result in termination of a the Policy.

Further, you also get the facility to withdraw a pre-determined percentage of your fund value regularly through your own Systematic Withdrawal Plan (SWP). This can help you to meet specific needs such as child's education or money for day-to-day expenses during retirement.

You can choose to receive the regular payouts monthly, quarterly, half-yearly or yearly, on a specified date. The first payout is made on the withdrawal start date specified by you.

For example, if you choose 6% p.a. of the fund value to be withdrawn yearly, then an amount equal to 6% of the fund value would be paid on the chosen date every year.

Please refer to Clause 5, Systematic Withdrawal Plan under Terms and Conditions for more details.

## 3. Choice of four portfolio strategies

You have a choice out of four portfolio strategies to save your money as per your risk appetite. You can have your funds in any one of the following strategies. These are given below in detail.

### a) **Target Asset Allocation Strategy**

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and

maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

The re-balancing of units shall be done on the last day of each Policy quarter. If the last day of the quarter is a non-working day, then the next working day's NAV (i.e. the price per unit of the Fund) will be applicable.

#### **b) Trigger Portfolio Strategy 2**

Maintaining a pre-defined asset allocation is a dynamic process and is a function of constantly changing markets. The Trigger Portfolio Strategy 2 enables you to take advantage of substantial equity market swings.

Under this strategy, your savings will initially be distributed between two funds Multi Cap Growth Fund, an equity oriented fund, and Income Fund, a debt oriented fund in a 75%: 25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a pre-defined trigger event.

Working of the strategy:

- The trigger event is defined as a 10% upward or downward movement in NAV of Multi Cap Growth Fund, since the previous rebalancing. For determining the first trigger event, the movement of 10% in NAV of Multi Cap Growth Fund will be measured vis-à-vis the NAV at the inception of your strategy.
- On the occurrence of the trigger event, any fund value in Multi Cap Growth Fund which is in excess of three times the Income Fund, fund value is considered as gains and is transferred to the liquid fund - Money Market Fund by cancellation of appropriate units from the Multi Cap Growth Fund. This ensures that gains are capitalized, while maintaining the asset allocation between Multi Cap Growth Fund and Income Fund at 75%:25%
- In case there are no gains to be capitalized, funds in Multi Cap Growth Fund, Income Fund and Money Market Fund are redistributed in Multi Cap Growth Fund and Income Fund in 75:25 proportion.

#### **c) Fixed Portfolio Strategy**

This strategy enables you to manage your savings actively. Under this strategy, you may choose to save your monies in any of the fund options (as detailed in Clause 1, Choice of Funds above) in proportions of your choice. You can switch monies amongst these funds using the switch option.

Within the Fixed Portfolio Strategy you also have the option to select Automatic Transfer Strategy (ATS). It is not compulsory for the policyholder to select the Automatic Transfer Strategy. If this is chosen you can save all or part of your savings in Secure Opportunities Fund, Money Market Fund, Income Fund and/or Constant Maturity Fund and transfer a fixed amount in regular instalments into one or more of the following funds: Bluechip Fund, Maximiser V, Multi Cap Growth Fund, Maximise India Fund, Value

Enhancer Fund, Opportunities Fund, Focus 50 Fund, India Growth Fund, Balanced Advantage Fund, Sustainable Equity Fund, Mid Cap Fund or Mid Cap Hybrid Growth Fund, Mid Cap Index Fund, Mid Cap 150 Momentum 50 Index Fund, Multicap 50 25 25 Index Fund or MidSmall Cap 400 Index fund.

Similarly, you can choose to save all or part of your savings in one or more of the following funds: Bluechip Fund, Maximiser V, Multi Cap Growth Fund, Maximise India Fund, Value Enhancer Fund, Opportunities Fund, Focus 50 Fund, India Growth Fund, Balanced Advantage Fund, Sustainable Equity Fund, Mid Cap Fund, Mid Cap Hybrid Growth Fund, Mid Cap Index Fund Mid Cap Index Fund, Mid Cap 150 Momentum 50 Index Fund or Multicap 50 25 25 Index Fund or MidSmall Cap 400 Index Fund and transfer a fixed amount in regular instalments into one or more of Secure Opportunities Fund, Money Market Fund, Income Fund and Constant Maturity Fund.

There would be no additional charges for Automatic Transfer Strategy (ATS). The following conditions apply to Automatic Transfer Strategy (ATS).

- This automatic transfer will be done in either weekly, fortnightly or monthly equal instalments, as per chosen frequency.
- Automatic Transfer Strategy (ATS) would be executed by redeeming the required number of units from fund chosen at the applicable unit value and allocating new units in the destination fund at the applicable unit value.

Once selected, Automatic Transfer Strategy (ATS) will be renewed and would be regularly processed for the entire term of the policy or until the Company is notified, through a written communication, to discontinue the same. The Automatic Transfer Strategy will not be applicable if the source Fund Value is less than the amount nominated for transfer.

#### **d) Lifecycle based Portfolio Strategy 2**

Your financial needs are not static and keep changing with your life stage. It is, therefore, necessary that your policy adapts to your changing needs. This need is fulfilled by the LifeCycle based Portfolio Strategy 2.

##### **Key features of this strategy**

- **Age based portfolio management**

At Policy inception, your savings are distributed between two funds, Multi Cap Growth Fund and Income Fund, based on your age. As you move from one age band to another, your funds are re-distributed based on your age. The age wise portfolio distribution is shown in the table.

##### **Asset allocation details at Policy inception and during the Policy term**

<b>Age of Life Assured (years)</b>	<b>Multi Cap Growth Fund</b>	<b>Income Fund</b>
Up to 25	80%	20%
26 – 35	75%	25%
36 – 45	65%	35%

Age of Life Assured (years)	Multi Cap Growth Fund	Income Fund
46 – 55	55%	45%
56 – 65	45%	55%
66 +	35%	65%

- **Quarterly rebalancing**

On a quarterly basis, units shall be rebalanced as necessary to achieve the above proportions of the Fund Value in the Multi Cap Growth Fund and Income Fund. The re-balancing of units shall be done on the last day of each Policy quarter. The above proportions shall apply until the last ten quarters of the Policy are remaining.

- **Safety as you approach maturity**

As your Policy nears its maturity date, you need to ensure that short-term market volatility does not affect your accumulated savings. In order to achieve this, your savings in Multi Cap Growth Fund will be systematically transferred to Income Fund in ten instalments in the last ten quarters of your Policy.

#### 4. Unlimited free switches between fund for Fixed Portfolio Strategy:

If you have chosen the Fixed Portfolio strategy, you can switch units from one fund to another depending on your financial priorities and savings outlook as many times as you want. This benefit is available to you without any charge. The minimum switch amount is ₹ 2,000. Switches are not available under other portfolio strategies.

#### 5. Change in Portfolio Strategy (CIPS)

You can change your portfolio strategy up to four times in a policy year provided the monies are not in Discontinued Policy Fund. This facility is provided free of cost. Any unutilized Change in Portfolio Strategy cannot be carried forward to the next policy year.

On moving to the Life Cycle based Portfolio Strategy 2 or Trigger Portfolio Strategy 2, the existing funds as well as all future premiums will be allocated between Multi Cap Growth Fund and Income Fund as per the Strategy details mentioned earlier.

On moving to the Target Asset Allocation Strategy or Fixed Portfolio Strategy, you must specify the proportions amongst the choice of funds available in which the existing funds and future premium should be saved.

## 6. Settlement Option

You have an option to receive the Maturity Benefit as a structured payout over a period of up to 5 years after maturity, using Settlement Option. This option has to be chosen before maturity.

- With this facility, you or your nominee can opt to get payments on a yearly, half yearly, quarterly or monthly (through ECS) basis, all payable in advance.
- The first payout of the settlement option will be made on the date of maturity.
- The available number of units under the Policy shall be divided by the residual number of instalments to arrive at a number of units for each instalment. This means that the same number of units will be paid out at each instalment date. Further, in case of savings in more than one Fund, the number of units to be withdrawn shall be in the same proportion of the units held at the time of payment of each instalment. The value of the payments will depend on the number of units and the respective fund NAVs on the date of each payment.
- Only the Fund Management Charge and mortality charge, if any, would be levied during the settlement period.
- No 'Return of Mortality and Policy Administration Allocation Charges' or Maturity Booster will be added during this period.
- You may avail facility of switches as per the terms and conditions of the policy. Partial withdrawals and Change in Portfolio Strategy are not allowed during the settlement period.
- Rider cover shall not be available during the settlement period.
- In the event of death of the Life Assured during the settlement period, Death Benefit payable to the Claimant as lump sum will be higher of
  - a. Fund Value including Top-up Fund Value, if any
  - b. 105% of total premiums paid

On payment of Death Benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

- At any time during the settlement period, you/Claimant will have the option to withdraw the entire Fund Value.
- On payment of last instalment of the settlement option or the remaining fund value, as applicable, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.
- During the settlement period, the investment risk in the investment portfolio is borne by you/the Claimant.
- If the fund value becomes nil, the policy will terminate and no benefits will be payable
- Settlement option for maturity benefit is not available for Whole Life policy.

## 7. Premium Redirection

This feature is applicable only if you have opted for the Fixed Portfolio Strategy, provided monies are not in Discontinued Policy Fund. If you have selected Fixed Portfolio Strategy, at policy inception you specify the funds and the proportion in which the premiums are to be saved in the funds.
