Performance update

November 07, 2019

Agenda

- Company strategy and performance
- Opportunity
- Industry overview

October 2019 update

Premium growth

	FY2019		H1-FY2020		7M-FY2020
₹ billion					
APE ¹	77.99	33.69	5.90	39.59	
YoY growth	0.1%	(0.4%)	15.9%	1.8%	
RWRP ²	70.95	30.49	5.53	36.02	
YoY growth	(4.9%)	(3.2%)	17.9%	(0.4%)	

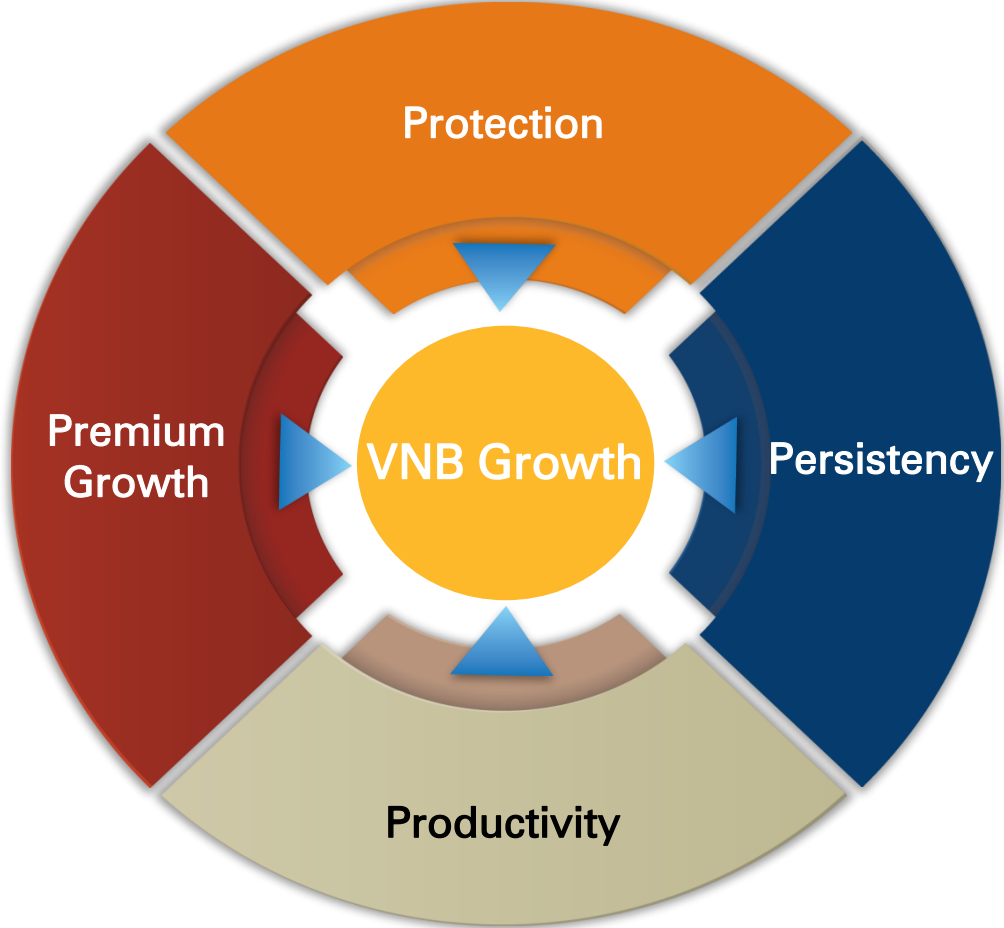

1. Annualized premium equivalent
 2. Retail weighted received premium
 Components may not add up to the totals due to rounding off

Agenda

- **Company strategy and performance**
- Opportunity
- Industry overview

Key strategic elements

**Customer centricity
continues to be at the core**

Aspiration to double the FY2019 VNB in 3 - 4 years

VNB growth

₹ billion	H1-FY2019	FY2019	H1-FY2020
Value of New Business (VNB) ¹	5.90	13.28	7.09
VNB margin	17.5%	17.0%	21.0%

1. For full year, based on actual cost; H1 : based on management forecast of full year cost

Strategic elements (1/4)

Premium
growth

- Deepen penetration in under-served customer segments
- Enhance current distribution
- Create new distribution
- Augment capability in Health and Protection
- Increase focus on Pension and Annuity

₹ billion		YoY growth	
APE ¹	77.99	YoY growth	12.4%
New business premium ²	102.52	YoY growth	20.5%
H1-FY2020	33.69		
FY2019	33.69		
H1-FY2020	51.52		
FY2019	51.52		

1. Annualized premium equivalent
2. Received premium for retail and group

Strategic elements (2/4)

Protection
focus

Continue to grow both retail and group lines of business

	FY2019	H1-FY2020
Protection APE	7.22	4.97
YoY growth	61.9%	86.8%
Protection mix	9.3%	14.8%

₹ billion

Strategic elements (3/4)

Persistence

Improve persistence across all cohorts

	FY2019	5M-FY2020
Persistence ¹	84.6%	83.6%
13 th month		
49 th month	63.8%	63.7%

1. Retail excluding SF computed as per IRDAI circular dated January 23, 2014

Strategic elements (4/4)

Productivity

Continue to leverage technology for process re-engineering and to drive productivity

₹ billion	H1-FY2019	FY2019	H1-FY2020
Cost/TWRP ¹	16.1%	15.0%	16.6%
Cost/TWRP (savings LOB)	12.7%	11.5%	11.0%

Key strategic elements

**Customer centricity
continues to be at the core**

4P: Premium

Product segments

Premium growth

- Deepen penetration in under-served customer segments
- Enhance current distribution
- Create new distribution
- Augment capability in Health and Protection
- Increase focus on Pension and Annuity

Segments	APE (₹ billion)			Mix	
	H1-FY2019	FY2019	H1-FY2020	FY2019	H1-FY2020
Savings	31.14	70.77	28.72	90.7%	85.2%

Technology initiatives

Objectives

Insta-insure

Data analytics based real time offers for customers

Applying data analytics on customers' occupation, health, financial and social scores available with us, we are able to offer pre approved life cover

Endeavour towards customer delight by ensuring the following

Reduced clicks for faster onboarding journey

No financial documents required

No medical requirements upto the limit

Simple, hassle-free insurance purchase experience

AI in servicing

For customer service

- To help customer service executive to understand customer better
- Next best action prediction, churn prediction, payment bounce prediction, pitch product to customer etc.

For due diligence

- To identify cases which should go for risk verification
- To identify fraudulent/risky profiles from our customer pool

For complaint management

- To understand customers' complaint with respect to mis-selling
- To help in quick and informed decision-making

For pre-claims assessment

- To identify potentially suspicious claims based on risk report

Nudge

Appropriate, short, crisp message for positive influence & appropriate actions

We have the capability to send customized messages to frontline personnel to help them in achieving their and organization's objectives

Design

- Place holder in all frontline facing applications

Notification feed

- Configurable nudge engine design

Approach

- Seamless notifications across digital properties
- Rollover on the nudge message to expand with details
- On click actionable
- Unread messages to be highlighted like notification

Claim for sure

With this service,
we promise to
settle death claims
in 1 day*

Interest will be paid
on claim amount
for every day of
delay beyond 1
working day

1 Day Death Claim Settlement is available for the following

Policies that
have been
active for
continuous 3
years

All mandatory
claim
documents
submitted at a
branch before
3 pm on a
working day

Total claim
amount of all
the policies is
less than or
equal to ₹ 15
million

Claim does
not require
any on ground
investigation

99.6%** of claim settled in 1 day; Average claim settlement time 1.2 days

*Subject to terms & conditions document available with claims team

**% of cases eligible for 1 day settlement; initiative launched in Q2-FY2020

Agenda

- Company strategy and performance
- **Opportunity**
- Industry overview

Favorable demography

Large and growing population base¹

2018 Population (mn)

High share of working population¹

Population of age 25-59 years (in mn)

Use of AI & ML to analyse structured & unstructured data

Embedded value

Analysis of movement in EV

₹ billion

1: EVOP is the embedded value operating profit net of tax

2: ROEV is the return on embedded value net of tax

EV results prepared as per APS 10 and reviewed by Milliman Advisors LLP
Components may not add up to the total due to rounding off

Embedded value

₹ billion	FY2017	FY2018	FY2019
Value of In force (VIF)	94.28	117.64	142.69
Adjusted Net worth	67.56	70.24	73.54
Embedded value¹	161.84	187.88	216.23
Return on Embedded Value (ROEV)	16.5%	22.7%	20.2%
EV growth-pre dividend	20.6%	23.4%	19.6%
EV growth-post dividend	16.1%	16.1%	15.1%
VNB as % of opening EV	4.8%	7.9%	7.1%
Operating assumption changes and variance as % of opening EV	2.9%	6.3%	4.7%

EV methodology

- EV results prepared based on the Indian Embedded Value (IEV) methodology and principles as set out in Actuarial Practice Standard 10 (APS10) issued by the Institute of Actuaries of India (IAI)
- EV consists of Adjusted Net Worth (ANW) and Value of in-force covered business (VIF)
 - ANW is market value of assets attributable to shareholders, consisting of
 - Required capital
 - Free surplus
 - Value of in-force covered business (VIF) is
 - Present value of future profits; adjusted for
 - Time value of financial options and guarantees;
 - Frictional costs of required capital; and
 - Cost of residual non-hedgeable risks

Components of ANW

- Required capital (RC)
 - The level of required capital is set equal to the amount required to be held to meet supervisory requirements.
 - It is net of the funds for future appropriation (FFAs)
- Free surplus (FS)
 - Market value of any assets allocated to, but not required to support, the in-force covered business

Components of VIF (1/2)

- Present value of future profits (PVFP)
 - Present value of projected distributable profits to shareholders arising from in-force covered business
 - Projection carried out using 'best estimate' non-economic assumptions and market consistent economic assumptions
 - Distributable profits are determined by reference to statutory liabilities
- Frictional Cost of required capital (FC)
 - FCs represent investment management expenses and taxation costs associated with holding the Required capital
 - Investment costs reflected as an explicit reduction to the gross investment return

Components of VIF (2/2)

- Time value of financial options and guarantees (TVFOG)
 - Represents additional cost to shareholders that may arise from the embedded financial options and guarantees
 - Stochastic approach is adopted with methods and assumptions consistent with the underlying embedded value
- Cost of residual non-hedgeable risk (CRNHR)
 - An allowance for risks to shareholder value to the extent not already allowed for in the TVFOG or the PVFP
 - Allowance for asymmetric risks of operational, catastrophe mortality/morbidity and mass lapsation risk
 - Determined using a cost-of-capital approach
 - Allowance for diversification benefits among the non-hedgeable risks, other than the operational risk
 - 4% annual charge applied to capital required

Components of EV movement (1/2)

- Expected return on existing business (unwind)
 - Expected investment income at opening reference rate on VIF and ANW
 - Expected excess 'real world' investment return over the opening reference rate on VIF and ANW
- Operating assumption changes
 - Impact of the update of non-economic assumptions both on best estimate and statutory bases to those adopted in the closing EV
- Value of new business
 - Additional value to shareholders created through new business during the period

Components of EV movement (2/2)

- Operating experience variance
 - Captures impact of any deviation of actual experience from assumed in the opening EV during the inter-valuation period
- Economic assumption changes and Investment variance
 - Impact of the update of the reference rate yield curve, inflation and valuation economic assumptions from opening EV to closing EV
 - Captures the difference between the actual investment return and the expected 'real world' assumed return
- Net capital injection
 - Reflects any capital injected less any dividends paid out

Key assumptions underlying EV (1/2)

- Discount rate and Fund earning rates
 - Set equal to reference rates which is proxy for risk free rates
 - Reference rates derived on the basis of zero coupon yield curve published by the Clearing Corporation of India Limited
- Expenses and commission
 - Based on the Company's actual expenses during FY2019 with no anticipation for productivity gains or cost efficiencies
 - Commission rates are based on the actual commission payable to the distributors

Key assumptions underlying EV (2/2)

- Mortality and morbidity
 - Based on company's experience with an allowance for future improvements in respect of annuities
- Persistency
 - Based on company's experience
- Taxation
 - Taxation costs reflect the reduction in costs due to dividend income being tax exempt

Sensitivity analysis (FY2019)

Scenario	% change in VNB	% change in EV
Increase in 100 bps in the reference rates	(4.3)	(2.0)
Decrease in 100 bps in the reference rates	4.4	2.0

30	7.88%	8.05%	7.58%

Glossary

- **Annualized Premium Equivalent (APE)** – Annualized Premium Equivalent (APE) is the sum of the annualized first year premiums on regular premium policies, and ten percent of single premiums, from both individual and group customers
- **Assets under management (AUM)** - AUM refers to the carrying value of investments managed by the company and includes loans against policies and net current assets pertaining to investments
- **Embedded Value (EV)** - Embedded Value (EV) represents the present value of shareholders' interests in the earnings distributable from the assets allocated to the business after sufficient allowance for the aggregate risks in the business
- **Embedded Value Operating Profit (EVOP)** - Embedded Value Operating Profit (EVOP) is a measure of the increase in the EV during any given period due to matters that can be influenced by management
- **Retail Weighted Received Premium (RWRP)** - Premiums actually received by the insurers under individual products and weighted at the rate of ten percent for single premiums
- **Total weighted received premium (TWRP)** - Measure of premiums received on both retail and group products and is the sum of first year and renewal premiums on regular premium policies and ten percent of single premiums received during any given period
- **Persistency Ratio** - Persistency ratio is the percentage of policies that have not lapsed and is expressed as 13th month, 49th month persistency etc. depicting the persistency level at 13th month (2nd year) and 49th month (5th year) respectively, after issuance of contract
