## Benefits in detail

All the policy benefits are subject to policy being in force. A policy is in force if it is premium paying, fully paid, lapse or paid-up.

### Death benefit

On death of the life assured during the policy term, for a premium paying or fully paid policy, the following will be payable:

Death Benefit = Highest of,

- Sum Assured on death plus accrued Guaranteed<sup>#</sup> Additions and Bonuses\*
- GMB plus accrued Guaranteed<sup>#</sup> Additions and Bonuses\*
- Minimum Death Benefit

\*Bonuses consist of vested reversionary bonuses, interim bonus and terminal bonus, if declared.

Minimum Death Benefit is equal to 105% of the total premiums received up to the date of death.

All policy benefits cease on payment of the death benefit.

### Maturity benefit

On survival of the life assured till the end of the policy term for a policy on which all due premiums are paid, the following will be payable:

Maturity Benefit = Guaranteed<sup>#</sup> Maturity Benefit (GMB)  
 + accrued Guaranteed<sup>#</sup> Additions  
 + vested reversionary bonuses, If declared  
 + terminal bonus, If declared

Your GMB will be set at policy inception and will depend on policy term, premium, premium payment term, Sum Assured on death and gender. Your GMB may be lower than your Sum Assured on death.

- For example: For a male life aged 35 years, with a PPT of 10 years, policy term of 20 years, premium of ₹ 50,000 paid annually the GMB is ₹ 5,05,561. An illustration of the total benefits that you can receive is shown in the benefit illustration.

GMB is the Sum Assured on maturity. Maturity Benefit for a policy on which all due premiums are paid shall be at least equal to the total premiums (excluding any extra mortality premium, goods and services tax and cesses, if any) paid by the policyholder.

Guaranteed<sup>#</sup> Additions (GAs) totaling 5% of GMB each year will accrue during the first five policy years if all due premiums are paid. GAs accrue on payment of due premium.

Reversionary bonus, If declared, will be declared each year during the term of the policy starting from the first policy year.

The bonuses declared for ICICI Pru Savings Suraksha may differ between Limited Pay and Regular Pay options.

## Surrender benefit

If all premiums have been paid for at least two consecutive years, the policy will acquire a Guaranteed<sup>#</sup> Surrender Value.

On policy surrender, you will get higher of the following:

- Guaranteed<sup>#</sup> Surrender Value (GSV) plus cash value of accrued GAs and cash value of vested bonuses, if declared
- Non Guaranteed<sup>#</sup> Surrender Value (NGSV)

Where,

- o Cash value of vested bonuses =  
Guaranteed<sup>#</sup> Cash Value Factors For Vested Bonuses X Vested bonuses, if declared
- o Cash value of accrued GAs =  
Guaranteed<sup>#</sup> Cash Value Factors For GAs X Accrued Gas
- o These Guaranteed<sup>#</sup> Cash Value Factors convert the face value of accrued GAs and vested bonuses, if declared payable on maturity or earlier death, to their expected present value. These factors are guaranteed<sup>#</sup>.
- o The NSGV is not guaranteed<sup>#</sup>.

Please note, if you discontinue your premiums before your policy has acquired a surrender value, no benefits will be payable under the policy.

For more details on the surrender benefit, please refer to the policy document.

## What happens if you discontinue your premiums?

If you discontinue premium payment before your policy acquires a surrender value, your policy will lapse and no benefits will be paid. However, you can revive the policy within five consecutive years from the due date of the first unpaid premium. If premium payment is discontinued after the policy has acquired a surrender value, the policy would continue as a 'paid-up' policy with reduced benefits as explained below:

$$\text{Paid-up Sum Assured on death} = \text{Sum Assured on death} \times \frac{\text{(Total number of premiums paid)}}{\text{(Total number of premiums payable)}}$$

$$\text{Paid-up Guaranteed}^{\#} \text{ Additions} = \text{Sum of accrued GAs}$$

$$\text{Paid-up Guaranteed}^{\#} \text{ Maturity Benefit} = \text{GMB} \times \frac{\text{(Total number of premiums paid)}}{\text{(Total number of premiums payable)}}$$

On death of the life assured during the policy term when the policy is paid-up, the paid-up Sum Assured on death, paid-up GAs, vested reversionary bonuses and contingent reversionary bonus, if declared, will be payable.

On survival of the life assured till the end of the policy term, the paid-up GMB, Paid-up GAs, vested reversionary bonuses and contingent reversionary bonus, if declared, will be payable.

A paid-up policy will not be entitled to future GAs, reversionary bonuses or terminal bonus. However, contingent reversionary bonus, if declared may be given instead at the point the policy is made paid-up.

For more details on paid-up policies, please refer to the policy document.

## Revival of the policy

A policy which has discontinued payment of premiums may be revived subject to underwriting and the following conditions:

- The application for revival is made within 5 years from the due date of the first unpaid premium or before the end of the policy term, whichever is earlier. Revival will be based on the prevailing Board approved underwriting policy.

On revival of a lapsed policy, all benefits under the policy will be restored. All applicable guaranteed<sup>#</sup> additions and reversionary bonuses declared since premium discontinuance up to the date of revival shall accrue to the policy.
