These illustrations are for a healthy male life assured. If your policy offers guaranteed returns, then these will be clearly marked "guaranteed" in the Benefit Illustration on this page. Since your policy offers variable returns, the given illustration shows different rates of assumed future investment returns. The maturity benefit of your policy is dependent on a number of factors, including future performance.

# What happens if you discontinue your premiums?

If you discontinue premium payment before your policy acquires a surrender value, your policy will lapse and no benefits will be paid.

Your policy will acquire a surrender value on payment of:

- At least 2 full years' premium if PPT is less than 10 years
- At least 3 full years' premium if PPT is greater than or equal to 10 years

If premium payment is discontinued after the policy has acquired a surrender value, the policy would continue as a 'paid-up' policy with reduced benefits.

If you have discontinued paying premiums, you may revive your policy by making an application for revival within 2 years from the due date of the first unpaid premium but before the termination date of policy, subject to policy terms and conditions.
