

## **Public disclosure requirement (December 31, 2019)**

### **1. Data**

Policy data is extracted from policy administration systems and checks are carried out to ensure completeness and accuracy of data.

### **2. Treatment of valuation parameters**

The liability valuation calculations have been carried out using an actuarial software. Assumptions for each plan are updated in the model. Specific characteristics of each policy such as age at entry, sum assured, term, etc. are either directly obtained from data or calculated within the model.

### **3. Treatment of future premiums**

The premiums are assumed to be received when due. For linked business, premium income is recognized when the associated units are allocated. Fees on linked policies are recognized when due. For the purpose of projections in the actuarial models, future premiums are assumed to be received when due. As premiums are taken to be received when due, no adjustment is required for non-annual plans.

### **4. Valuation method –Methods adopted in the determination of mathematical reserves**

In general the method of valuation is the gross premium valuation. The reserve held represents the net present value of benefits and expenses less premiums. Following is the broad basis of the valuation:

- The cash flows are projected assuming zero lapses.
- The reserves are calculated on a per policy basis.
- Any negative reserves are zeroised, so that a policy is not treated as an asset.
- The minimum value of reserves is the higher of guaranteed surrender value, non guaranteed surrender value, and zero.

The following sections contain specific details about reserving for different lines of business.

## Non-participating business

Contract status	Category	Applicability	Method
In-force	Individual products	Base plan	Higher of the gross premium valuation (GPV) reserve and surrender value (if applicable) and zero
		Riders	Higher of GPV reserve and unearned premium reserve (UPR) on a policy basis
	Group products – non-participating	All group risk products except Group Term, Group Term Plus and Group Micro one year renewable term assurance (OYRTA)	Higher of GPV reserve and Surrender value
		Group Term, Group Term Plus, Group Micro OYRTA and riders	Unearned premium plus an IBNR reserve
Reduced paid up	Individual products	Base plan	Higher of GPV reserve or surrender value on reduced benefit with no future premiums payable
Lapse reserve	Individual products	Base plan	Reserve for expenses till the end of the revival period
Lapsed/reduced paid up, in respect of those that are expected to revive	Individual products	Reinstatement reserve	<p>Reinstatement rate is applied to the difference between (A) &amp; (B) where,</p> <p>(A) = the reserve assuming contract is In force and                      (B) = the revival premiums minus commissions payable plus the paid-up/lapsed reserve,</p> <p>Subject to a floor of zero.</p>
Additional reserves	Individual products Cost of guarantee (if applicable)		In addition, we hold a reserve in respect of cost of guarantee (CoG) calculated on a risk neutral basis.

## Participating business

Contract status	Category	Applicability	Method
In-force	Individual products	Base plan	Higher of the GPV reserve and surrender value (if applicable) and zero, with allowance for future bonus and associated tax and transfers to shareholders
		Riders - excluding accident benefit riders	Higher of GPV reserve and UPR on a policy basis
		Riders - accident benefit riders	UPR
	Group products – participating		Higher of the GPV reserve with allowance for future bonus and associated tax and transfers to shareholders and face value of liability
Reduced paid up (all)	Individual products	Base plan	Higher of GPV reserve or surrender value on reduced benefit with no future premiums payable
Lapse reserve (all)	Individual products	Base plan	Reserve for expenses till the end of the maximum revival period
Lapsed or reduced paid up, in respect of those that are expected to revive	Individual products	Reinstatement reserve	<p>Reinstatement rate is applied to the difference between (A) &amp; (B) where,</p> <p>(A) = the reserve assuming contract is In force and            (B) = the revival premiums minus commissions payable plus the paid-up/lapsed reserve,</p> <p>Subject to a floor of zero.</p>

## Unit linked business

Contract status	Category	Applicability	Method
In-force premium paying/ premium holiday	Unit reserves	Unit fund	The unit reserve is the number of units held by the policyholder multiplied by the NAV at the valuation date.
	Non-unit reserves – except for group linked	Life cover, rider benefits and adequacy of charges to cover expenses	For base policy and associated mortality benefit we take the higher of the unearned risk benefit charges and all the projected cash flows.  We allow for zeroisation under all contracts at a policy level, so that credit is taken for future positive cash flows only to the extent that they offset subsequent negative cash flows. For riders a higher of GPV reserve and UPR on a policy basis
Lapsed	Unit reserves	Unit fund	Paid up/surrender value to the credit of the policyholders
		Reinstatement reserve	A reinstatement rate is applied to the difference between the full unit value and the paid up/surrender value. We adjust this reserve for death benefits payable prior to revival or foreclosure. The balance of the unit fund forms the linked FFA. (This does not apply to ULIPs sold since September 2010.) The Linked FFA has been included under the unit reserves since September 30, 2019 valuation.
	Non-unit reserves	Adequacy of charges to cover expenses during the maximum revival period.  Reinstatement reserve	Projected cash flows as for in-force contracts allowing for zeroisation. The cash flows do not include cost of insurance charges and claims outgo.  For pre-September 2010 policies Reinstatement rate is applied to the difference between the reserve assuming contract is in force and the charges on outstanding premiums and non-unit reserve.  For post-September 2010 policies the reinstatement reserve is calculated by allowing for refund of surrender penalty, levy of back charges, release of lapsed non-unit reserve and setting up of in-force non-unit reserve, all multiplied by probability of revival, subject to a floor of zero.

## Unit Linked business (continued)

Contract status	Category	Applicability	Method
Additional reserves	CoG	Linked plans with capital guarantee	In addition, we hold a reserve in respect of cost of guarantee (CoG) calculated on a risk neutral basis.
	NNCA	For applicable linked products	A reserve is held for the cost of Non Negative claw back additions to the unit fund to comply with the applicable RIY requirements calculated on a stochastic basis
Group linked	Non-unit reserves		No reserves are held on account of expenses as charges are currently higher than expenses and expected to remain so.  In case of mortality benefits, unexpired risk premium is held.

## Non-participating Variable Insurance Products

Contract status	Category	Applicability	Method
In-force	Non-unit reserves	Non participating variable life and pension	Policy account value is held in addition to general fund reserve.

### 5. Bonus rates for participating policies

The current year declared reversionary and terminal bonuses and historical reversionary bonus rates given in Annexure I.

#### 5.1. Policyholders' reasonable expectations (PRE)

Due consideration is given to the reasonable expectations of policyholders when making a distribution of surplus. "Reasonable" is not explicitly defined in the regulations and is left to the interpretation of the Appointed Actuary. Our interpretation of "Reasonable" refers to a well-informed, financially literate policyholder.

The main drivers of PRE are currently our point of sale material, the bonus rates declared last year and past communication with policyholders.

#### 5.2. Taxation and shareholder transfers

The gross premium reserve (GPV) includes reserve for transfer and tax. Tax is provided on surplus emerging under participating products. For the current valuation, we have assumed that the participating pension business is tax exempt. However, our interpretation of PRE would be that future bonuses would in any case reflect the taxes charged to the fund. As a result, the reserves would not be changed even if taxes came to be charged.

## 6. Valuation assumptions

Valuation parameters are set prudently and include MAD as required under APS7 issued by Institute of Actuaries of India.

### 6.1. Interest Rate

The valuation discount rates for the various lines of business are set out below:

Valuation Discount rate (%)	Mar-19		Dec-19	
	Minimum	Maximum	Minimum	Maximum
<b>(a) Individual Business</b>				
(a.1) Life - Participating policies	4.44	5.37	4.44	5.37
(a.2) Life - Non-participating policies	4.63	6.48	4.63	6.48
(a.3) Annuities - Participating policies	NA	NA	NA	NA
(a.4) Annuities – Non-participating policies	5.64	5.64	5.73	5.73
(a.5) Annuities - Individual pension plan	NA	NA	NA	NA
(a.6) Unit Linked	4.81	4.81	4.81	4.81
(a.7) Health insurance	5.66	5.66	5.66	5.66
<b>(b) Group Business</b>				
Life - Non-participating policies	4.94	4.94	4.94	4.94

### 6.2. Expense Inflation

The inflation assumption is 4.19% at December 31, 2019. There is no change in inflation assumption from March 31, 2019.

### 6.3. Mortality and morbidity assumptions

The mortality assumptions for different products expressed as a percentage of Standard table are as below:

<b>Plan</b>	<b>Valuation basis at March 31, 2019</b>	<b>Valuation basis at December 31, 2019</b>
Retail		
Participating (Life and Pension)	90% to 130% of IALM 06-08 rated up by 1 year for males and rated down 1 year for females	110% to 160% of IALM 12-14 rated up by 1 year for males and rated down 1 year for females
Non Participating	45% to 220% of IALM 06-08 rated up by 1 year for males and rated down by 1 year for females depending on products	55% to 255% of IALM 12-14 rated up by 1 year for males and rated down by 1 year for females depending on products
Linked	10% to 190% of IALM 06-08 rated up by 1 year for males and rated down by 1 year for females depending on products	10% to 210% of IALM 12-14 rated up by 1 year for males and rated down by 1 year for females depending on products
Rural	200% of IALM 06-08	235% of IALM 12-14
Health	35% to 60% of IALM 06-08 rated up by 1 year for males, rated down by 1 year for females	40% to 70% of IALM 12-14 rated up by 1 year for males, rated down by 1 year for females
Annuity	20% to 50% of LIC 96-98 for males, rated down by 4 years for females with appropriate mortality improvement	20% to 50% of LIC 96-98 for males, rated down by 4 years for females with appropriate mortality improvement
Group		
Non Participating Group	70% to 325% of IALM 06-08 rated up by 1 year for males and rated down by 1 year for females depending on products	50% to 402% of IALM 12-14 rated up by 1 year for males and rated down by 1 year for females depending on products
Group Term	Unearned premium basis	Unearned premium basis

Morbidity rates used are based on CIBT 93 table, adjusted for expected experience, or on risk rates provided by reinsurers.

#### 6.4. Expense Assumptions

Type of expense (₹)	Valuation basis at March 31, 2019	Valuation basis at December 31, 2019
<b>Renewal expense per policy</b>		
All conventional and unit linked (includes in-force premium paying, paid up policies, lapsed/premium discontinuance state within revival period policies)	140 to 570	140 to 570
Rural	55	55
<b>Renewal expense per premium</b>		
All conventional and unit linked in force, paid up and lapsed policies (% of annual premium)	0.83% to 2.40%	0.83% to 2.40%
<b>Claim expenses per policy</b>	205 to 14,945	205 to 14,945

#### 6.5. Future bonus rate assumptions for participating policies

Supportable future reversionary bonus rates are calculated at a product level. These bonus rates are consistent with the other valuation assumptions, subject to a floor of zero, and with PRE, and is targeted to exhaust the asset shares at valuation date.

#### 6.6 Reserves for incurred but not reported (IBNR) claims

IBNR reserves are required for claims which may have been incurred at the valuation date but which have not been reported to the company.

For Group One year renewable term assurance (OYRTA) policies we hold an IBNR reserve based on annual premium of these policies. For other group short term micro insurance products, the IBNR reserve is based on expected claim cost net of reinsurance recovery.
