## L-42- Valuation Basis (Life Insurance) as at end March 31, 2023

Name of the insurer :- ICICI Prudential Life Insurance Co. Ltd

## 1. Data

Policy data is extracted from policy administration systems and checks are carried out to ensure completeness and accuracy of data.

## 2. Treatment of valuation parameters

The liability valuation calculations have been carried out using an actuarial software. Assumptions for each plan are updated in the model. Specific characteristics of each policy such as age at entry, sum assured, term, etc. are either directly obtained from data or calculated within the model.
3. Valuation method -Methods adopted in the determination of mathematical reserves

In general the method of valuation is the gross premium valuation. The reserve held represents the net present value of benefits and expenses less premiums. The reserves are calculated on a per policy basis. Any negative reserves are zeroised, so that a policy is not treated as an asset. The minimum value of reserves is the higher of guaranteed surrender value, non guaranteed surrender value, and zero.

The following sections contain specific details about reserving for different lines of business.

Non-participating business

| Contract status | Category | Applicability | Method |
| :---: | :---: | :---: | :---: |
| In-force | Individual products | Base plan | Higher of the gross premium valuation (GPV) reserve and surrender value (if applicable) and zero |

## 4. Bonus rates for participating policies

The current year declared reversionary, cash and terminal bonuses and historical reversionary bonus rates given in Annexure I.

### 4.1. Policyholders' reasonable expectations (PRE)

Due consideration is given to the reasonable expectations of policyholders when making a distribution of surplus. "Reasonable" is not explicitly defined in the regulations and is left to the interpretation of the Appointed Actuary. Our interpretation of "Reasonable" refers to a well-informed, financially literate policyholder.
The main drivers of PRE are currently our point of sale material, the bonus rates declared last year and past communication with policyholders.

### 4.2. Taxation and shareholder transfers

The gross premium reserve (GPV) includes reserve for transfer and tax. Tax is provided on surplus emerging under participating products. For the current valuation, we have assumed that the participating pension business is tax exempt. However, our
interpretation of PRE would be that future bonuses would in any case reflect the taxes charged to the fund. As a result, the reserves would not be changed even if taxes came to be charged.

## 5. Valuation assumptions

Valuation parameters are set prudently and include margin for adverse deviation (MAD) as required under APS7 issued by Institute of Actuaries of India.
The range (minimum to maximum) of parameters used for valuation for individual and group business as at $31^{\text {st }}$ March 2023 are given in Annexure II and Annexure III respectively.

## 6. Reserves for incurred but not reported (IBNR) claims

IBNR reserves are required for claims which may have been incurred at the valuation date but which have not been reported to the company. IBNR reserve is held for all group and retail protection products.
