## Choice of four portfolio strategies

### 1. Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

The rebalancing of units shall be done on the last day of each Policy quarter. You can avail this option at inception or at any time later during the Policy Term.

### 2. Trigger Portfolio Strategy 2

For an investor, maintaining a pre-defined asset allocation is a dynamic process and is a function of constantly changing markets. The Trigger Portfolio Strategy 2 enables you to take advantage of substantial equity market swings and invest on the principle of “buy low, sell high”.

Under this strategy, your investments will initially be distributed between two funds Multi Cap Growth Fund, an equity oriented fund, and Income Fund, a debt oriented fund in a 75%: 25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a pre-defined trigger event.

Working of the strategy:

- The trigger event is defined as a 10% upward or downward movement in NAV of Multi Cap Growth Fund, since the previous rebalancing. For determining the first trigger event, the movement of 10% in NAV of Multi Cap Growth Fund will be measured vis-à-vis the NAV at the inception of your strategy.
- On the occurrence of the trigger event, any fund value in Multi Cap Growth Fund which is in excess of three times the Income Fund, fund value is considered as gains and is transferred to the liquid fund - Money Market Fund by cancellation of appropriate units from the Multi Cap Growth Fund. This ensures that gains are capitalized, while maintaining the asset allocation between Multi Cap Growth Fund and Income Fund at 75%:25%.

- In case there are no gains to be capitalized, funds in Multi Cap Growth Fund, Income Fund and Money Market Fund are redistributed in Multi Cap Growth Fund and Income Fund in 75:25 proportion.

### 3. Fixed Portfolio Strategy

This strategy enables you to manage your investments actively. Under this strategy, you can choose to invest your monies in any of the following fund options in proportions of your choice. You can switch monies amongst these funds using the switch option.

The details of the funds are given in the table below:

- ATS would be executed by redeeming the required number of units from fund chosen at the applicable unit value and allocating new units in the destination fund at the applicable unit value.

#### **4. Lifecycle based Portfolio Strategy 2**

Your financial needs are not static and keep changing with your life stage. It is, therefore, necessary that your policy adapts to your changing needs. This need is fulfilled by the LifeCycle based Portfolio Strategy 2.

##### **Key features of this strategy**

- **Age based portfolio management**

At Policy inception, your investments are distributed between two funds, Multi Cap Growth Fund and Income Fund, based on your age. As you move from one age band to another, your funds are re-distributed based on your age. The age wise portfolio distribution is shown in the table.

## Asset allocation details at Policy inception and during the Policy term

Age of Life Assured (years)	Multi Cap Growth Fund	Income Fund
Up to 25	80%	20%
26 – 35	75%	25%
36 – 45	65%	35%
46 – 55	55%	45%
56 – 65	45%	55%
66 +	35%	65%

- **Quarterly rebalancing**

On a quarterly basis, units shall be rebalanced as necessary to achieve the above proportions of the Fund Value in the Multi Cap Growth Fund and Income Fund. The rebalancing of units shall be done on the last day of each Policy quarter. The above proportions shall apply until the last ten quarters of the Policy are remaining.

- **Safety as you approach maturity**

As your Policy nears its maturity date, you need to ensure that short-term market volatility does not affect your accumulated savings. In order to achieve this, your investments in Multi Cap Growth Fund will be systematically transferred to Income Fund in ten instalments in the last ten quarters of your Policy.

The Policyholder can only have his funds in one of the Portfolio Strategies.
