## Benefits in detail

All the policy benefits are subject to the policy being in force. A policy is in force if it is premium paying, fully paid-up or partly paid-up.

### Death benefit

On death of the life assured during the policy term, for a premium paying or fully paid policy <sup>T&C<sup>6</sup></sup>, the following will be payable:

Death Benefit = Higher of (A,B),

Where

A = Sum Assured on Death, plus subsisting bonuses\* already accrued, plus accrued guaranteed additions

B = 105% of all the premiums paid as on date of death

Sum Assured on Death is defined as, highest of

- 10 X (Annualized Premium + underwriting extra premium, if any + loadings for model premiums, if any)
- Minimum guaranteed sum assured on maturity
- Absolute amount assured to be paid on death

\*Bonuses consist of accrued reversionary bonuses, interim bonus and terminal bonus, if any.

Minimum guaranteed sum assured on maturity is the Guaranteed Maturity Benefit (GMB)  
Absolute amount assured to be paid on death is 10 times the Annualized Premium.

All policy benefits cease on payment of the death benefit.

### **Maturity benefit**

On survival of the life assured till the end of the policy term for a policy on which all due premiums are paid, the following will be payable:

Maturity Benefit = Higher of (D, E)

Where, D = Guaranteed Maturity Benefit (GMB)

+ accrued Guaranteed Additions

+ subsisting reversionary bonuses already accrued to the policy, if any

+ terminal bonus, if any

E =  $100.1\% \times$  (annualized premium plus loadings for modal premiums, if any)

Your GMB will be set at policy inception and will depend on age, policy term, premium, premium payment term and gender. Your GMB may be lower than your Sum Assured on death.

- For example: For a male life aged 35 years, with a PPT of 10 years, policy term of 20 years, premium of ₹ 30,000 paid annually the GMB is ₹ 2,29,050. An illustration of the total benefits that you can receive is shown in the benefit illustration.

Guaranteed Additions (GAs) as a percentage of annualized premium is set out in the following table:

<b>Policy year/ PPT</b>	<b>5 years or 7 years</b>	<b>10 years, 15 years or 20 years</b>
<b>1 - 5</b>	8%	10%
<b>6 - 10</b>	10%	12%
<b>11 - 15</b>	12%	15%
<b>16 onwards</b>	15%	18%

- o During PPT: GA will accrue on premium payment\*
- o After PPT: GA will accrue at the beginning of policy year

\*For monthly premium frequency, 1/12th times GA will be accrued every month on premium payment. For half yearly premium frequency, 0.5 times GA will be accrued on premium payment.

Reversionary bonus, if any, will be declared each year during the term of the policy starting from the first policy year <sup>T&C5 and T&C7</sup>.

### **Surrender benefit**

If the PPT of your policy is 10 years or more, the policy will acquire a surrender value after payment of three full years' premium. If PPT is less than 10 years, the policy will acquire a surrender value after payment of two full years' premium.

On policy surrender, you will get higher of the following:

- Guaranteed Surrender Value plus guaranteed surrender value of any subsisting bonus and guaranteed additions, as applicable.
- Special Surrender Value (SSV).

Where,

- o Guaranteed Surrender value of subsisting bonuses =  
Guaranteed Surrender Value Factors for subsisting bonuses X Subsisting bonuses accrued
- o Surrender value of accrued GAs =  
Guaranteed Surrender Value Factors for guaranteed additions X Accrued GAs
- o These Guaranteed Surrender Value Factors convert the face value of accrued GAs and subsisting bonuses accrued, payable on maturity or earlier death, to their expected present value. These factors are guaranteed.
- o The SSV is not guaranteed.

Please note, if you discontinue your premiums before your policy has acquired a surrender value, no benefits will be payable under the policy.

For more details on the surrender benefit, please refer to the policy document.

### **What happens if you discontinue your premiums?**

If you discontinue premium payment before your policy acquires a surrender value, your policy will lapse and no benefits will be paid. However, you can revive the policy within two years from the due date of the first unpaid premium.

If premium payment is discontinued after the policy has acquired a surrender value, the policy would continue as a 'paid-up' policy with reduced benefits as explained below:

**Paid-up Sum Assured on death =**

$$\text{Sum Assured on death} \times \frac{(\text{Total number of premiums paid})}{(\text{Total number of premiums payable})}$$

**Paid-up Guaranteed Maturity Benefit =**

$$\text{GMB} \times \frac{(\text{Total number of premiums paid})}{(\text{Total number of premiums payable})}$$

**Paid-up Guaranteed Additions =**

$$\text{Sum of all GAs at Maturity} \times \frac{(\text{Total number of premiums paid})}{(\text{Total number of premiums payable})}$$

On death of the life assured during the policy term when the policy is paid-up, the paid-up Sum Assured on death, paid-up GAs, accrued reversionary bonuses and contingent reversionary bonus<sup>T&C7</sup>, if any, will be payable.

On survival of the life assured till the end of the policy term, the paid-up GMB, Paid-up GAs, accrued reversionary bonuses and contingent reversionary bonus<sup>T&C7</sup>, if any, will be payable.

A paid-up policy will not be entitled to future GAs, reversionary bonuses or terminal bonus. However, contingent reversionary bonus may be given instead at the point the policy is made paid-up.

For more details on paid-up policies, please refer to the policy document.

## Revival of the policy

A policy which has discontinued payment of premiums may be revived subject to underwriting and the following conditions:

- The application for revival is made within 2 years from the due date of the first unpaid premium and before the termination date of policy. Revival will be based on the prevailing Board approved underwriting policy.

- The policyholder furnishes, at his own expense, satisfactory evidence of health of the life assured as required by the Company.
- The arrears of premiums together with interest at such rate as the Company may charge for late payment of premiums are paid.

The revival of the policy may be on terms different from those applicable to the policy before premiums were discontinued; for example, extra mortality premiums or charges may be applicable. The revival will take effect only if it is specifically communicated by the Company to the policyholder.

On revival of a paid-up policy, the paid-up Sum Assured on death, paid-up GAs and paid-up GMB will be restored to the Sum Assured on death, GAs and GMB applicable at the time of premium discontinuance. All applicable GAs, and reversionary bonuses declared since premium discontinuance up to the date of revival, shall accrue to the policy and the contingent reversionary bonus attached to the policy will be reversed.
