**ICICI Pru Cash Advantage is a participating life insurance plan.**
How does ICICI Pru Cash Advantage work?

1. At policy inception, you choose your premium, premium payment option, premium payment mode, Sum Assured and cash benefit mode.
2. Your GCB and GMB are calculated using the above mentioned parameters along with your age and gender.
   - For example: For a male life aged 35 years, with a PPT of 10 years, policy term of 20 years, premium of ₹50,000 paid annually the GMB is ₹2,64,760. An illustration of the total benefits that you can receive is shown in the benefit illustration.
3. GCB is payable in advance during the payout term T&C4. Payout term begins as soon as the premium payment term is over and terminates at the end of the policy term.
4. In the unfortunate event of death of the life assured during the policy term, death benefit is payable to the nominee.
5. On survival of the life assured till the end of the policy term, Guaranteed Maturity Benefit (GMB) is payable along with vested reversionary bonuses (RB) plus terminal bonus T&C5, if any.

* These GMBs are for a male life assured and will be different for female lives.
**Benefits in detail**

**Death benefit**

On death of the life assured during the policy term, for a premium paying or fully paid policy, irrespective of the Guaranteed Cash Benefits paid, the following benefits are payable to the nominee.

Death Benefit = Maximum of (A, B, C)

Where

- **A** = Sum Assured plus Bonuses*
- **B** = GMB plus Bonuses*
- **C** = Minimum Death Benefit

*Bonuses consist of vested reversionary bonuses, interim bonus and terminal bonus, if any.

Minimum Death Benefit is equal to 105% of sum of premiums paid till date (excluding extra mortality premiums, Goods & Services Tax and Cess, if any).

All policy benefits cease on payment of the death benefit.

**Cash Benefit**

Throughout the payout term, Guaranteed Cash Benefit (GCB) is payable in advance, provided the life assured is alive and the policy is fully paid. GCB can be received in monthly or annual instalments. GCB is a percentage of the Guaranteed Maturity Benefit (GMB) and depends on cash benefit mode as per the table below.

</thead>
<tbody>
<tr>

<tr>

**Maturity Benefit**

On survival of the life assured till the end of the policy term for a fully paid policy, Maturity Benefit is payable.

Maturity Benefit = Maximum of (A, B)

Where, **A** = Guaranteed Maturity Benefit plus vested reversionary bonuses, if any plus terminal bonus, if any

**B** = 100.1% of total premiums paid (excluding any extra mortality premium, Goods & Services Tax and Cess, if any) less GCBs received

Please note, GMB is the Sum Assured on Maturity and will be calculated, at inception, based on your premium, premium payment option, premium payment mode, Sum Assured, cash benefit mode, age and gender.

For example, if an annual premium of ₹50,000 is paid for a premium payment term of 10 years, the Maturity Benefit plus the sum of GCBs received during the policy term will be at least 100.1% of the total premiums paid (₹500,500 = ₹50,000 x 10 x 100.1%).

\]

\[
\text{Paid-up Guaranteed Cash Benefit} = \frac{\text{GCB} \times \text{(Total number of premiums paid)}}{\text{(Total number of premiums payable)}}
\]

\[
\text{Paid-up Guaranteed Maturity Benefit} = \frac{\text{GMB} \times \text{(Total number of premiums paid)}}{\text{(Total number of premiums payable)}}
\]
